

BOMBS AWAY

By Leo Myrh and William Bezos

Nevil Chamberlain has announced war on Germany after Adolf Hitler annexed other country's so evacuation has started, from now 1000 of parents have signed their contract about sending their child/children away to the countryside.

8 young children ready for evacuation with all of their Gas masks strapped onto their heads.

Leo Flash has also said what it was like walking to his new family and what his new family were like. Leo Flash has said, "The walk felt like forever and ever it felt like months, years! But I'm here now and my family are really nice and feed me well and the mother has other kids I can play with!"

On the 1st September 1939, Children have started being evacuated from their parents and homes. They have all hopped on the train and have all been evacuated by now. We have got feedback from the children on the train one of the children, Leo Flash has said, "The train was bumpy and loud and I was squashed in between an old lady and a tall pregnant woman. They were chatting all the way to where we went." Another child, William Higgle-Piggle said this, "It was amazing on the train, but really loud at the same time but I was also worrying that I was going to be separated from my brother and that my new family would be horrid, but I did enjoy looking out of the window and seeing all of the new stuff I have not seen before."

So, it is pleasant for some but some have opposite feelings against this evacuation. It also seems like it's going to be more than a year until they can come back and see their families again unless their families die from the upcoming war.
