## Evacuation starts today!

Families are evacuating to keep them safe from bombs.

By Trinity and Eliza War and doctor correspondents.

Children around the world have been packing up their belongings getting ready for the move. Teachers have been helping the children to feel calm and not to worry, the station they went to was called Waterloo Station. Due to moving, everybody is furious at Adolf Hitler for breaking the Munich Agreement.

Children evacuating to a safer place.

Some children have been talking about what they think might happen to them and what they feel about this, Eliza said, "I'm worried about if I will ever see my family again and if my foster family will make me their slave."

Trinity commented, "I am so annoyed about this and I hope I have a loving family just like my one back in home. I also hate that we have agreed to have war! And I don't like wearing a tag with my name on I feel like luggage!"

Children, mums with young children and teachers have been evacuated to the country side or even to Canada and Australia. About 5 out of 100 evacuees had no proper toilet training.

One billeting officer reported how when a six-year-old boy went to the toilet in the front room, his mother shouted, "You dirty thing, messing up the lady's carpet. Go and do it in the corner."

Some evacuees are EXTREMELY UNHAPPY! But many are really enjoying living in the country side, and have made strong bonds with their foster families.

Anderson has decided that people living in rural areas will have no choice about taking in the evacuees. Some people complained. Some of the kids in their new families are already begging to go home so we are hoping for the children to have their families normal again and dads not to die.
